PROFESSIONAL SUMMARY

Full-stack developer (Laravel + Vue 3) with 2+ years building production systems that handle real money and real users. Core developer on a multi-tenant Laravel + Vue 3 SACCO banking platform serving 9+ organizations, and led development of its WhatsApp Business messaging end to end, and shipped 10+ live applications across fintech, e-commerce, healthcare and real estate. Writes clean, maintainable code (SOLID, REST API design, automated tests with PHPUnit, Vitest and Playwright) and works comfortably with Git and CI/CD. Hands-on with agentic AI: built a RAG chatbot with vector search and tool-based booking automation.

TECHNICAL SKILLS

Backend: Laravel (PHP, Composer), Django, Django REST Framework, Node.js, Express, Flask
Frontend: Vue 3 (Pinia), HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Languages: PHP, JavaScript, TypeScript, Python, SQL
Testing & Tooling: PHPUnit, Vitest, Playwright, Git, Postman, REST API design
Databases: PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Redis
APIs & Integrations: M-Pesa Daraja (STK Push, C2B, B2C), Africa's Talking (SMS, USSD), WhatsApp Cloud API, REST, GraphQL, XML-RPC
Cloud & DevOps: AWS, Docker, Docker Compose, CI/CD (GitHub Actions, Bitbucket Pipelines), Nginx, Vercel, Git, RabbitMQ
Monitoring & Automation: Grafana (daily production monitoring), Playwright (E2E testing & browser automation), n8n workflow automation
AI & Data: Retrieval-Augmented Generation (RAG), Vector Search (Supabase pgvector), LLM Integration, Prompt Engineering
Architecture: Microservices, Multi-tenant SaaS, System Design, RESTful API Design

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER — Pendo Media, Nairobi (Oct 2025 - Present)

- Core developer on SnB, a multi-tenant Laravel + Vue 3 SACCO core banking platform serving 9+ organizations, deployed on-premise and as SaaS
- Built WhatsApp Business messaging end to end across two systems: in PendoAdmin's WhatsApp microservice (Node.js/Express, Knex, RabbitMQ, Redis) — Meta Embedded Signup/OAuth onboarding, automatic token rotation, multi-WABA template sync, Meta-compliant template management and per-category wallet billing
- Integrated it into SnB (Laravel + Vue 3): queued outbox with atomic send-claims and a scheduled-send sweeper, delivery-status webhooks plus polling reconciliation, WhatsApp OTP with SMS fallback, and CSV/Excel bulk compose with message scheduling
- Integrated M-Pesa Daraja API (STK Push, C2B, B2C) with retry logic, idempotency, and

automated transaction reconciliation across 4 production applications

- Built core SnB modules: chama/group savings (registration, contribution cycles, split accounts, disbursements with configurable maker-checker approval), invite-based member onboarding with official roles, loans with guarantor requests and repayment schedules, Standing Orders V2, and automated ledger posting (UnifiedDepositPoster), backed by PHPUnit and Vitest tests
- Led 2-month on-site deployment in Mogadishu, Somalia: took the platform live with international stakeholders and wrote its end-to-end user guide
- Deployed and maintained multi-environment infrastructure using Docker and Bitbucket Pipelines CI/CD with zero-downtime releases; monitored service health across 10+ microservices via Grafana dashboards

INDEPENDENT SOFTWARE CONSULTANT (Oct 2024 - Present, concurrent with Pendo)

Mustard Imports — Live wholesale group-buying e-commerce platform at mustardimports.store

- Architected and deployed Django 5 + Vue 3 platform with 1,300+ products across 12 categories, sourcing from China, Turkey, and Dubai
- Integrated M-Pesa Daraja API for payments; implemented automated inventory scraping from supplier catalogues
- Docker + Nginx deployment on a 2GB-RAM InterServer VPS — serving real customers with a physical store in Nairobi CBD

Sereniminds Wellness Clinic — Clinic management system prototype

- Built AI-powered mental health chatbot using RAG, Supabase vector store, and Google Calendar/Zoom/Gmail API integration, automating 15-minute virtual consultation bookings

ODOO ERP DEVELOPER — AG Properties (2025)

- Customized Odoo 19.3 SaaS real estate portal via Python XML-RPC API, QWeb template overrides, and CSS/JS injection — transforming standard e-commerce into full-featured real estate platform
- Live: agproperties.odoo.com

ICT INSTRUCTOR — Waithaka Vocational Training Centre (Sep - Nov 2025)

- Trained 30+ students in Python, JavaScript, and n8n workflow automation — 85% course completion rate, with several students progressing to tech roles or further training
- Maintained 98% uptime across 30+ computer lab workstations through hands-on network configuration and hardware troubleshooting

JUNIOR SOFTWARE DEVELOPER (INTERN) — Amtech Technologies Ltd (Sep - Dec 2023)

- Developed INVGMT construction inventory management system using Python, Django, and Microsoft SQL Server
- Built centralized expenditure analytics dashboard with dynamic project completion tracking and ETL processes using Microsoft Power Query and SQL Server

EDUCATION & LANGUAGES

- BSc Computer Science — Technical University of Mombasa (2020 - 2024)
- English — C1 (fluent) · Swahili — native · References available on request
